Capgemini

Bangalore, Maharashtra

Dear Hiring Manager,

I am writing to express my interest in the position of **Associate Software Engineer** at **Capgemini**, as advertised through our campus recruitment drive. I am a dedicated and passionate individual with a strong foundation in **C++**, **Object-Oriented Programming**, **Node.js**, and **React.js**, and I am eager to contribute to Capgemini's innovative projects and collaborative environment.

During my internship at **Bharat Intern** as a **Backend Developer**, I gained valuable hands-on experience in full-stack web development. I successfully developed a **Voting Application**, where I worked on backend logic, database management, and API integration, enhancing both my technical and problem-solving abilities. This experience strengthened my understanding of software development lifecycles and real-world deployment challenges.

I am particularly drawn to Capgemini because of its reputation for technological excellence, continuous learning culture, and commitment to innovation. I believe my technical skills, combined with my enthusiasm for software development and teamwork, make me a strong fit for this role.

I would be grateful for the opportunity to contribute to your team and further develop my skills under the guidance of Capgemini's talented professionals. Thank you for considering my application. I look forward to the opportunity to discuss how my background aligns with your company's goals.

Sincerely,

Aayush Bhimendra Rahangdale
